

ShadowTrack ShadoWatch™

The digital assistant to rehabilitation

Enables positive reinforcement and gamification on a small discreet device that encourages the participants throughout their rehabilitation process.

The ShadoWatch™ is a durable, tamper-proof GPS tracking device worn on the wrist, offering a more discreet and comfortable alternative to traditional ankle bracelet monitoring systems.

Features & Benefits

- Custom text messages sent directly to the device
- Appointment reminders appear on the screen
- Active vibration for non-compliance
- Plug-in or on-the-go charging capability
- Participants can view their calendar for that day and the next day
- Latest 4G LTE cellular network connectivity
- Simple two-button operation
- On-board zone storage of any size and shape
- IP-68 Waterproof and submersible
- 36-hour battery life ensures continuous operation

Small, Discreet, Accurate

ShadoWatch™ is a lightweight GPS monitoring smartwatch that combines secure tracking with everyday wearability. Designed for low to medium-risk clients, it offers real-time location reporting, tamper alerts, and two-way communication all in a discreet, user friendly design.

- Simple two-button operation
- Power loss detection with backup battery
- Movement and tamper detections
- GPS and cellular connectivity
